Space Themed Printing Picture

Supplies

- Selection of paper cups, card board tubes and bottle tops
- Trays of paint in a variety of colours including metallic
- Gold and silver glitter
- A3 black paper

- Glue stick
- Coloured paper

- 1 Place the black paper landscape. To print a planet take one of the circular objects and place it into the paint, rim down. Then print onto the paper; leaving a ring shape like the outline of a planet.

- 2 Repeat step 1 with different sized circles and different coloured paints, then leave to dry.

- 3 Add features to the inside of the planets using fingers dipped in paint, for example a red thumb print for Jupiter's spot, or the side of a little finger to make stripes for Saturn.

- 4 Now add shooting stars to the picture! To do this, dip your thumb into metallic paint, then print onto the paper, dragging the thumb off to leave a trail behind.

- 5 Use a glue stick to add glitter to stars tails or the rings of planets, then leave to dry.

- 6 To make the large planet at the bottom, first draw a curved line onto a piece of card and cut out. Then cover this by sticking on torn pieces of sugar paper. Finally cut along the curve again, then glue to the finished planet onto the picture.
