

The Lollypop Bird Feeder

You will need:

- 50 lollypop sticks
- A piece of cord or string
- super glue
- a tub of PVA glue
- a paintbrush
- 1 bag of bird seed

To make the bird feeder:

- Line up 12 lollypop sticks. Glue 2 sticks across them. Turn it over.
- Do a second row of lollypop sticks going in the opposite direction to strengthen the base.
- Alternate lollypop sticks around the frame.
- Continue alternating lollypop sticks around the outside until you have 6 rows, gluing each stick down as you go.
- Use a paintbrush to put a layer of PVA glue all over the feeder. Set aside to dry.
- Attach the cord or string to the sides of the bird feeder.
- Fill it with bird seeds and hang it on the tree in your garden.
